At the same time, if a New Policy Record is Opened by mistake by performing one of these functions, i.e. New Policy, or dbl clicking an empty row, the System will automatically creates a New Record.

If this is a mistake and we want to get rid of it, we can delete it completely IF there are not yet any notes or other events on the Policy Record.

We cannot change a De-linked Insurance Account, because that is done automatically. But we can specify the Debtor Account. The Policy cannot be Active until a linked Debtor Account is specified.

This Account can be Opened from the Link available on the Insurance Account Screen and should be for the same Currency selected for the Policy.

A Policy is usually Pending until it is Issued at which time the necessary parameters, that allow it to be Active, are specified. For example, the Debtor Account, the Start Date. The Policy Number must be specified. Otherwise it would try to make it Active and Save the Record. The System will simply complain and say it cannot be Active yet because it needs to conform to certain criteria.

If a Policy does not get Issued at all, we will change it to "Cancelled" and also once a Policy has reached "End of Term" and it is no longer Active, it is not Renewed on the same Policy Number. Then it will also become "Cancelled".

The Commission Basis is quite important and it can be Net or Gross. Now the difference comes in when there is Tax on the Premium.

If there is No Tax on the Premium, then it does not matter what this setting is. But when there is Tax on the Premium and the Commission Basis is Net, then the Commission is calculated on the Premium Net of the Tax that is calculated on top of the Premium.

If it is Gross then it is calculated on the full amount, including the Tax.

Slide 40

The Premium should be specified once it is known and when the Policy becomes Active.

555 Incid

333 Claim Ant Paid

۳

This amount or value is used when the System raises Premiums automatically. In other words if the Policy is payable Monthly. Then this will be the Monthly Premium. If it is Quarterly then this will be the Quarterly Premium, etc.

We can also raise Incidents against the Policy and these Incidents typically may result in Claims.

But an Incident itself does not necessarily mean there is a Claim.

We can also raise New Diary entries directly from the Policy Master and in this case, such a New Diary entry will be flagged for this Insurance Account.

Not necessarily this Policy, but this Insurance Account that is linked to this Policy.

So we could say that the Policy Master is dealt with on a step-by-step basis.

We can Create it or Open the Record initially without the Policy having been Issued.

Perhaps a Quote has been raised. We do not know the Policy Number or any of those particular details at this stage, but we can Open the Policy Record and when the other information becomes available, the Policy is Issued and it becomes Active.

Then of course we can indicate all the rest of the information and we can do further Maintenance at any stage.
