

Slide 1

Slide notes: Multi Journals have a 'Post Later' queue where Journals in progress await posting, or possibly could get deleted without being posted at all. If a Multi Journal is captured but then deleted without being posted, then it is listed on the Report for Journals Deleted Before Posting.

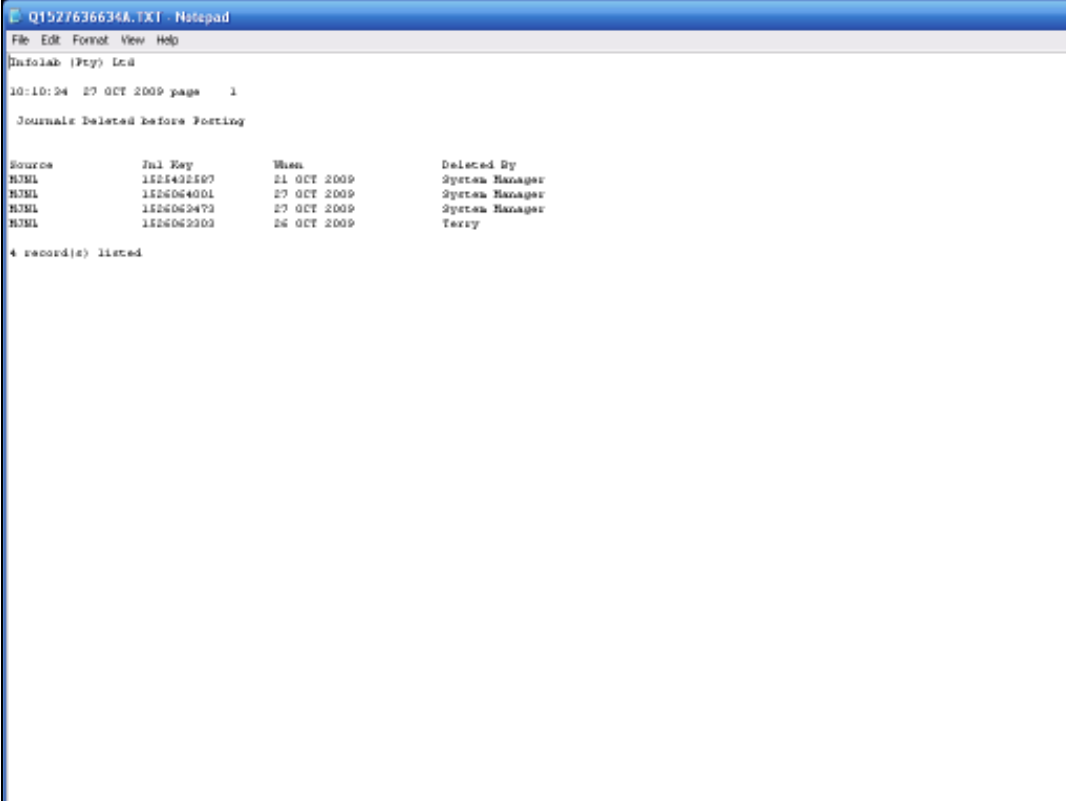

Slide 2

Slide notes: A User may occasionally complain that his or her Journal has disappeared, and produce a Printout of the Journal that has disappeared, because Multi Journals in the Post Later queue have a print option with all the Journal detail. In fact, the Multi Journals never disappear unless they expire and get removed by the system, but sometimes such a Journal is deleted by a User.

Slide 4

Slide notes: And that is the primary purpose for this Report. It does not list the deleted Journal detail, but it does show the original Master Key and this same Key will be listed on a User's printout, in which case it can be verified that the Journal did not disappear but was in fact deleted by a User.
